

# Long Duration Corporate Bond

MARKETING COMMUNICATION

## Management Team

### Portfolio Manager

Neil A. Burke  
John Hyll

## Highlights

- Benchmark aware strategy broadly diversified across issuers and industries of the US investment grade bond market
- Tactical allocation through beta management and bottom-up security selection help drive portfolio construction
- Duration and yield curve are typically managed relatively close to the benchmark
- The primary drivers of alpha are security selection and industry allocation

## Objective

Seeks to provide diversified, actively managed exposure to the long end of the US investment grade corporate market

## Benchmark

Bloomberg US Long Corporate Index

<sup>^</sup>Performance and risk metrics are calculated on a gross-of-fee basis and do not reflect the deduction of fees and expenses. Please see the Composite trailing returns for standard gross and net performance.

Performance data shown represents past performance and is no guarantee of future results. Current performance may be lower or higher than quoted.

Gross returns are net of trading costs. Net returns are gross returns less effective management fees. Returns may increase or decrease as a result of currency fluctuations. Indices are unmanaged and do not incur fees. It is not possible to invest directly in an index.

**There is no guarantee that the investment objective will be realized or that the strategy will generate positive or excess return.**

*\*Strategy assets are comprised of Long Duration Corporate Bond and Long Duration Credit.*

*\*\*Due to the composite's significant cash flow policy there was a temporary two month period in July 2009 and August 2009 when there were no accounts included in the composite. Therefore the continuous track record for the composite begins September 1, 2009 despite the April 1, 2009 composite inception date.*

*Duration and Maturity for equity securities are deemed to be zero.*

**Diversification does not ensure a profit or guarantee against a loss.**

## KEY RISKS

Credit Risk, Issuer Risk, Interest Rate Risk, Liquidity Risk, Prepayment Risk and Extension Risk. Diversification does not ensure a profit or guarantee against a loss. Investing involves risk including possible loss of principal.

*Due to rounding, Sector, Currency, Country, Credit Quality, Duration and Maturity distribution totals may not equal 100%. This portfolio is actively managed and characteristics are subject to change. Credit Quality ratings on underlying securities of the holdings within the portfolio are received from S&P, Moody's and Fitch and converted to the equivalent [S&P/Moody's/Fitch] major rating category. Loomis Sayles takes the median rating of the three agencies when all three agencies rate a security, the [higher/lower] of the two ratings if only two agencies rate a security, and one rating if that is all that is provided. Not Rated securities do not necessarily indicate low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time. Cash & Equivalents may include unsettled trades, fees and/or derivatives.*

*The Composite includes all discretionary separate and commingled accounts with market values greater than \$20 million managed by Loomis Sayles and seeks to provide diversified, actively managed exposure primarily to the long end of the US investment grade corporate market. Prior to June 1, 2015 the Composite minimum account size requirement was \$5 million. The Composite inception date is April 1, 2009. The Composite was created in 2010.
